

HR Employee Attrition Analysis

Power BI Dashboard – Business Questions / Desired Outcomes

Dataset

IBM HR Analytics Employee Attrition & Performance — 1,470 employee records and 35 columns. The dataset includes employee demographics, department, job role, satisfaction, business travel, overtime, and attrition information.

Dashboard objective: Analyze employee composition, job satisfaction, work-life balance, department structure, business travel, overtime, gender and attrition patterns.

Dashboard Questions

#	Business question	Suggested Power BI visual
1	How many employees are included in the dataset?	KPI Card
2	What is the average Work-Life Balance score across employees?	KPI Card
3	What is the average Job Satisfaction score across employees?	KPI Card
4	How many employees belong to each Department?	Donut Chart
5	How does employee count vary across Job Satisfaction levels (1–4)?	Line Chart / Column Chart
6	How does Marital Status vary across different Job Roles?	Clustered Column Chart
7	How does employee attrition differ between Male and Female employees?	Stacked Column Chart
8	How is Business Travel distributed across the different Departments?	Clustered Column Chart
9	How does Overtime participation differ by Department?	Donut Chart / Column Chart
10	Which Education Fields are represented among the employees?	Slicer + supporting chart
11	How does the dashboard change when filtering employees by Attrition (Yes/No)?	Slicer + KPI/Charts
12	How does the employee analysis change when the Age range is filtered?	Age Range Slicer + KPI/Charts

Recommended Dashboard Filters

Filter	Column
Attrition	Attrition
Age range	Age
Education Field	EducationField
Optional	Department / Gender / BusinessTravel

Power BI Build Guidance

The questions are intentionally written so that the dashboard visuals provide the answers. Use the same or closely related visual types shown in the reference dashboard.

Question	Main fields to use
Q1	EmployeeNumber / Employee Count
Q2	WorkLifeBalance
Q3	JobSatisfaction
Q4	Department + Employee Count
Q5	JobSatisfaction + Employee Count
Q6	JobRole + MaritalStatus + Employee Count
Q7	Gender + Attrition + Employee Count
Q8	Department + BusinessTravel + Employee Count
Q9	Department + OverTime + Employee Count
Q10	EducationField
Q11	Attrition as a page/report slicer
Q12	Age as a numeric range slicer

Important Dataset Notes

- The source dataset contains 1,470 rows and 35 columns.
- Attrition is a Yes/No field.
- JobSatisfaction and WorkLifeBalance are coded on 1–4 scales in the original dataset.
- EducationField, Department, JobRole, Gender, MaritalStatus, BusinessTravel and OverTime are categorical fields.
- Do not invent dates or monthly attrition trends: the source dataset does not contain employee hire/exit dates.
